SURE Antibac Handwash Free	🧼 Hand cleaning & disinfection, plant-based soap
Soft Care Des E H5	🧼 Alcoholic hand disinfection gel where no water is available. Does not spill on floor.

What is RetailCare?

Store appearance, cleanliness and mastering your Food Safety are key to meeting customers' expectations.

Shoppers are looking for convenient, spacious, organised and safe stores. A well-organised and clean store engages shoppers to walk in and motivates them for return visits *

53% of customers factor store cleanliness as a top reason to select a store over another **

80% of shoppers would rather have a clean store than a technical one ***

RetailCare

Our comprehensive programme for you and your industry.

This encompasses :

- **Chemical programme** for cleaning and sanitation (products, dispensers, staff training, cleaning guidance and documentation)
- **Food safety** excellence through surveys and audits by Diversey consulting
- **Store appearance programme** using our unique solution of TASKI chemical and floor cleaning machines

We have been successful in satisfying our customers for over a century.

What will RetailCare provide for you?

Safe Stores

Shoppers take Food Safety for granted.

They would not spontaneously mention it when asked about their key expectations from shopping for food.

Diversey provides a unique and comprehensive programme that supports & enhances your Food Safety Management System with the expertise of Diversey Consulting & CMX.

Ease of Clean

Our programme is easy and simple to use and covers all needs.

The specific cleaning chemicals are chosen for their efficacy and lowest hazard levels.

We train users to apply the programme efficiently, safely and with an eye on the cost.

A few examples of our Hero Products

Saving you time, effort and money. Keeping staff and customers safe.

Drain maintenance

Clogging of drains is an issue when sugar snakes build up, leading to expensive maintenance costs.

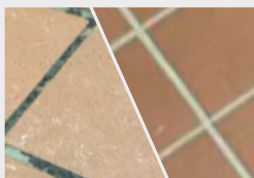

Suma Drain GTS Plus is a preventative compound that prevents such build up and thus saves maintenance costs.

Carbon removal

Stubborn burnt residues on pans are hard to scratch away.

Suma Carbon Remover provides an easy-to-use solution that will ease the cleaning of pans and save water, energy and working hours.

Grease removal

Greasy floors are unsafe and unsightly. Our bacteria-fortified, no-rinse

Suma Bio-Floor offers an easy, effective and time-saving way to remove this grease.

Risk Reduction

Through our digital platforms you get actionable data. Visualise store scores using dashboards and deep-dive features.

Walk-in freezers

Cleaning these is normally very expensive and time-consuming - transferring food thawing chamber, cleaning, re-freezing and refilling - and it puts Food Safety at risk with regard to cold holding. **Suma Freeze** removes the lengthy process, making this operation easier, cheaper and safer.

Floor cleaning

Minimising the slip risk on your prep area and counter floors is key. Using mops and brushes does not always mean the floor is free from debris and grease. **TASKI swingo 250** is a micro scrubber-drier, small enough to fit behind counters, and powerful enough to thoroughly clean your floors.
