

# Industry expertise for science-based food safety and hygiene programs

We use a science-based approach for hygiene, auditing, and analysis through initiatives guided by leaders in industry, academia and regulatory

Focusing on the food safety system and organizational culture allows us to optimise processes to ensure compliance and programme effectiveness

We are proud of the many customers who trust us as their service partners

## Our Consultative Expertise:

- **Microbiology:** Translating science for the food industry
- **Food Safety Services:** A science-based approach to assess risk
- **Data Science:** Synergising the 0's and 1's from internal data with insights from academia to drive change
- **Behaviour Science:** Partnerships with academia to understand how we can best help end-users succeed
- **Chemistry:** Innovative solutions for healthy, hygienic facilities that drive cost savings
- **Regulatory:** Expertise and relationships with regulators to deliver best practices aligned with government requirements
- **Industry Leadership:** Key food safety conference participation and investment to promote thought-leadership
